## PROFESSIONAL SUMMARY

Final-year BIT student at the University of Moratuwa. Experienced in monitoring systems, analyzing logs, and identifying root causes of issues from 7 months of IT support work. Passionate about building a career in Linux system administration and DevOps.

## TECHNICAL SKILLS

|            |                                                                                                                          |
|------------|--------------------------------------------------------------------------------------------------------------------------|
| Linux      | Command-line operations, file system hierarchy, user & permission management, process management, shell scripting basics |
| Languages  | Java, Python, JavaScript / TypeScript                                                                                    |
| Frameworks | Spring Boot, Next.js                                                                                                     |
| Databases  | Microsoft SQL Server, PostgreSQL                                                                                         |
| Tools      | Git, GitHub, Maven, Linux shell, basic networking (IP, DNS, HTTP), Basic cloud awareness (AWS / cloud fundamentals)      |

## WORK EXPERIENCE

**Technical Support Executive** Jun 2024 – Jan 2025  
[ myPOS Software Solutions (Pvt) Ltd ] - Nugegoda, Sri Lanka

- Monitored system performance and performed system monitoring to detect issues early in IT infrastructure environments
- Managed user accounts, permissions, and access control under supervision of senior system administrators
- Analyzed logs to identify root causes and improve overall system stability and reliability
- Assisted in IT infrastructure operations, supporting daily activities related to system administration and maintenance
- Performed routine system health checks and maintenance activities to ensure system availability
- Handled incident escalation following standard operating procedures and ensured accurate reporting
- Supported basic network connectivity troubleshooting and system-related issues
- Worked collaboratively as part of a team to resolve technical problems efficiently
- Communicated technical issues clearly to both technical and non-technical stakeholders

## FINAL YEAR PROJECT

**Online Dress Rental & E-Commerce Platform** | University of Moratuwa  
Spring Boot · Next.js · PostgreSQL · Linux · JWT · REST API · PayHere · Google Calendar API

- Developing a full-stack web application in a Linux environment
- Managing PostgreSQL database and Java application processes on Linux
- Monitoring logs and debugging issues during development and deployment
- Implementing REST APIs with Spring Boot (JWT authentication, RBAC)
- Integrating third-party services (Google OAuth, Google Calendar API, PayHere, Cloudinary)

## EDUCATION

---

**Bachelor of Information Technology (BIT) - External Degree** 2023 – Present

*University of Moratuwa, Sri Lanka | Final Year - Semester 6*

- Relevant Coursework: Operating Systems, Computer Networks, Information Security, Database Systems
- Strong academic foundation in OS concepts: process management, memory management, file systems, user & permission models

## SOFT SKILLS

---

- Good communication skills
- Attention to detail
- Motivated and eager to learn
- Ability to work under guidance and assist team members
- Problem-solving mindset

## ADDITIONAL EXPERIENCE / PRACTICAL EXPOSURE

---

- Performed Linux system administration tasks in a virtual environment (Ubuntu)
- Practiced system monitoring, log analysis, and troubleshooting scenarios
- Worked with basic networking concepts (connectivity, IP configuration)
- Conducted peer teaching sessions before exams
